

## Select Energy Solutions

A new partnership with Select Energy Solutions, Inc. will empower Marriotts Ridge High School students with knowledge about career options in current and emerging fields.

Under the terms of the partnership, Select Energy Solutions will work with school staff to help students assess career fields in relation to their personal, learning and career goals. As part of this effort, the partners will develop an informal speakers' bureau consisting of professionals from a wide range of fields to share information with Career Research and Development classes.

Select Energy Solutions will also provide information about "green" technologies and environmental trends, and will serve in an advisory capacity to help MRHS students and staff achieve Green School certification. The company may also offer internships for highly motivated, qualified students interested in careers in the energy industry.

Select Energy Solutions, Inc. ([www.select-energy.com](http://www.select-energy.com)) develops custom electric, natural gas or water conservation systems to meet each customer's unique needs and goals. The company applies multiple technologies and specialized equipment to identify solutions for energy problems that maximize efficiency, reduce operating costs, and minimize environmental impact.
